

FOR IMMEDIATE RELEASE

Accudynamics, LLC acquires DCG Precision Manufacturing, LLC

Bethel, Connecticut September 30, 2022 – Makers Forward, LLC portfolio company Accudynamics, LLC, acquires DCG Precision Manufacturing, LLC. As a subsidiary of Accudynamics, DCG will continue to provide premium quality machining, assembly, and development of custom components for aerospace, military suppliers, medical product manufacturers, and other commercial industries. All existing employees and management will remain with the company as DCG employees and are now part of the Makers Forward, LLC family of companies.

DCG Precision Manufacturing was founded in 1943 as a centerless grinding service provider in Danbury, CT. After decades of growth and expansion DCG developed into a leading supplier of precision machined components and assemblies to many of the nation’s premier manufacturers in the medical, aerospace, defense, and industrial markets. Relocated to Bethel, Connecticut, and operating in a 37,000 engineering and manufacturing facility, the ISO 9001 and AS9100 certified business operates a six day and two shift operation with capacity to grow. DCG’s focus on process improvement, cost-reduction programming, and exceptional quality has been the engine that drives the business.

“Accudynamics is excited to partner with Jerry, Paul and the entire DCG team to address the machined products and assemblies’ market together with Accudynamics. DCG’s capabilities, primarily the Swiss machining and grinding capabilities, will strengthen and grow the offerings available to Accudynamics customers” said Accudynamics President, Michael McKenna.

“The Accudynamics business has a world class engineering team, and we are very excited to leverage that resource with the newly acquired DCG business. We look forward to investing in upgrading the equipment and resources for DCG to continue to build out our collective capabilities and customer base” said Makers Forward Chief Executive Officer, Sean M Quinn.

“The entire DCG team has been very impressed with the knowledge and expertise at Accudynamics, and we are excited to combine that with our almost 80-year history at DCG. Being part of that team will help our customers build their success for the next 80 years” said Gerald Palanzo, President DCG Precision Manufacturing, LLC.
